

APPLICATION OVERVIEW DOCUMENT

BONU Member Services Platform

Congratulations on completing your application definition! This document presents a summary overview of your application as defined in the Pega platform. It encapsulates the key elements of your application's design, highlighting its core functionalities and overall structure.

Please note that this is a high-level view and does not include granular details like data models or sample data. It's an ideal resource for a quick reference, facilitating discussions among team members and stakeholders, and for guiding strategic decisions in your application development process.

Blueprint ID: BP-2020287

Application Context

This application is a comprehensive digital platform designed for the Botswana Nurses Union (BONU) to streamline member management and service delivery. It addresses the challenge of efficiently managing a large membership base and providing diverse services through a unified system. The platform features a Member Portal for self-service registration, profile management, application for various services (e.g., funeral insurance, legal aid, loans, merchandise, electronic contracts), and payment tracking. Concurrently, a Back Office Portal empowers Customer Service Representatives (CSRs) and administrators to review, process, approve, and manage member applications, payments, and service requests, ensuring efficient operations. The application automates membership subscriptions, premium/loan deductions, and order processing, significantly improving operational efficiency and member satisfaction. Expected outcomes include enhanced member engagement, improved access to union benefits, streamlined administrative processes, and robust reporting for informed decision-making, ultimately strengthening the union's support for its members.

Application Architecture

Users access the application through defined channels, assume specific roles, and trigger workflows that manage how work progresses. Those workflows operate on shared Data Objects to ensure the system stays consistent and up to date.
